

# D. H. PEERY CO

## GOLD MINES

Goldfield, Nevada.

### Second Allotment of Shares of Montgomery Mountain Mining Company.

### 100,000 Shares of \$1.00 par Value at 75 cents.

From the Goldfield Sun, April 30th.

A telegram from Salt Lake City announces that the first shipment of 28 tons of ore from the Montgomery-Shoshone Mines Co., whose property is located on the north half of Montgomery Mountain in Bullfrog, netted \$500 per ton from the smelters. The ore was taken across the 42 feet of vein uncovered in the Shoshone tunnel during the first month's development work, without sorting or sampling.

"The Shoshone ledge traverses the property of the Montgomery Mountain Mining Co."—E. A. MONTGOMERY, three-quarters owner of the Montgomery-Shoshone mine.

"It is only of a little development work before the Montgomery end of the mountain which is the south half, will prove as great a bonanza as the Shoshone end."—MAJOR W. A. STANTON, mining engineer, formerly on the staff of the late John Mackay at Virginia City.

"The Montgomery property is on the strike of the Shoshone ledge. The outcroppings on Montgomery Mountain indicates that the same ledge runs through both properties."—MALCOLM MACDONALD, consulting engineer of the Montana Tonopah Mining Co.

"The ore body which carries the high values in the Shoshone unquestionably exists in the Montgomery property. The ledge is well, clearly and distinctly defined from one end of the mountain to the other, a distance of a mile."—J. D. CAMPBELL, mining engineer, in charge of Chas. M. Schwab's and John McKane's Goldfield and Tonopah properties.

"I have prospected the ground of the Montgomery Mountain Mining Co., half a dozen times. It is second only to the Shoshone itself, and the Shoshone is the greatest gold mine I ever saw, in a mining experience of thirty years."—J. F. MITCHELL, mining engineer, formerly consulting engineer of the famous Yankee Girl mine of Colorado, and of the Ute and Ulay mines of Colorado, and other great gold mines.

#### GREATEST GOLD MINE PROSPECT IN THE WORLD.

The Montgomery Mountain Mining Company's property consists of seven claims, situated on the south half of Montgomery Mountain, in the Bullfrog district, and adjoining the Shoshone group of claims owned by the Montgomery-Shoshone Mines Co.

Stock in the Montgomery-Shoshone Mines Co., of the par value of \$1.00, is selling at \$3.00 per share in Goldfield, although the company is only a month old, and development has only been in progress for two months.

Development work on the Shoshone group consists of a tunnel driven into the side of the mountain for a distance of 110 feet, a raise to the surface of 47 feet, and of a winze 100 feet deep. There are also two drifts on the vein which has been exposed for a distance of 42 feet inside of the tunnel, and the wall of the vein has not yet been reached. The tunnel, the drifts, the raise and the winze are all in high grade ore.

Eminent mining engineers and practical mining men all agree that the same ledge that runs through the Shoshone runs through the Montgomery.

#### VIGOROUS DEVELOPMENT WORK.

Development work on a large and extensive scale has already been commenced on the property of the Montgomery Mountain Mining Co. A tunnel, the site of which was located by Chas. M. Schwab's famous

mining engineer, J. D. Campbell, is being driven into the side of the mountain with all possible speed, working night and day, with every indication that the Shoshone ledge will be encountered at from 50 to 100 feet.

A tunnel is also being driven in the same manner about 100 feet west, with the same object in view.

In addition, the company is beginning a tunnel on its Black Bull claim, lying on the southeast side of the mountain, with the intention of tapping an enormous quartz ledge, 18 feet wide, which seems to cut the Montgomery ledge almost diagonally. This ledge has not even been prospected by the Shoshone people, because they have had no time to do so, but they are also now driving, with the same purpose in view. From every appearance and indication this vein will be equally as good as the Shoshone on the same ground.

The first 28 tons of ore taken out of the Shoshone tunnel across the ledge, for a distance of 42 feet, without sorting or sampling, has netted the Montgomery-Shoshone Mines Co. \$500 per ton from the smelters at Salt Lake City.

The Montgomery-Shoshone ledge can be traced on the surface by any person, from one end of Montgomery Mountain to the other, a distance of nearly 5,000 feet, the croppings are so clear, distinct and well defined. It can easily be seen that it is practically one continuous vein running in a northeasterly and southwesterly direction through the entire mountain. It seems only a matter of a few months or less for development work to demonstrate that the Montgomery Mountain Mining Co.'s ore bodies are just as rich and just as big as those of its neighbor, the Montgomery-Shoshone Mines Co. Man has divided these properties, not nature. The tracing of this ledge is not a theoretical problem, but a simple certainty that is conceded by all who look at the property.

#### DIVIDENDS IN SIGHT.

Neither the company nor its agents are attempting to artificially "boost" or stimulate the price of shares. They are satisfied that they have a mine, and unlike many others, it will not take years to demonstrate it, because the moment the ledge is cut, then shipping begins, and the property being out of debt and money in the treasury, it is not improbable that the company will begin paying dividends within six months. The company is mining as economically and as practically as is possible, getting the best possible opinions, not only from one individual, but from the best mining talent in the west, and the work in every way will be done in a systematic and miner-like manner.

The only salaried officer of the company is the secretary.

The title to the property has been examined and passed upon by Vermilyea, Edmonds & Stanley, the leading mining lawyers of Nevada.

The property has been paid for in full. The ground is not bonded, but is owned absolutely by the company.

The company has, since acquiring the property, had the ground thoroughly prospected by the best informed prospectors of the Bullfrog region, and on numerous and many places on the surface rock has been found which pans very high gold values. At the present time one of the company's prospectors is "Al" James, who discovered the ore on the Montgomery-Shoshone mine before the owners knew what a marvelous property they owned. He vouches for

the fact that the Montgomery has the identical ledge and it is on his advice, together with that of So Camp, who recently resigned as superintendent of the famous January mine of Goldfield to become superintendent of this property, that the company is developing in the manner hereinbefore mentioned.

#### THE STOCK OFFERING.

The D. H. Peery Company, bankers and brokers of Goldfield, of which D. H. Peery is president, is the fiscal agent of the Montgomery Mountain Mining Company, of which D. H. Peery is also president.

One hundred thousand shares of the stock, of the par value of \$1.00, are offered to the public at 75 cents per share, and you have an opportunity to purchase a small block of it. The capitalization of the company is \$1,250,000, divided into 1,250,000 shares. These are fully paid up and non-assessable. There are 300,000 shares in the treasury.

D. H. Peery has interested himself in several other great Bullfrog properties, and the D. H. Peery Co. will handle all of these. It is believed that by permitting the general public to partake of the Montgomery Mountain Mining Company's offering, a large clientele will be gotten together for Mr. Peery's other splendid properties in Bullfrog, and it will be more profitable in the end to do business with many investors than a few. An offer of \$500,000 cash was made for all the stock in the Montgomery Mountain Mining Company a fortnight ago, but it was refused.

If you wish any stock in the Montgomery Mountain Mining Company, it will be necessary for you to telegraph your reservation, and follow up the same with a remittance in full at the rate of 75 cents per share for whatever number of shares you order.

The following is the directorate:

President and treasurer, D. H. Peery, banker and broker, formerly president of the Salt Lake Stock & Mining Exchange, and member of San Francisco Stock & Exchange Board; vice-president, Hon. John Sparks, governor of Nevada; C. K. McCornick, of McCornick & Co., bankers, Salt Lake City, director; D. E. Burley, General Passenger Agent, Oregon Short Line, Salt Lake City, director, and E. E. Edmonds, of the firm of Vermilyea, Edmonds & Stanley, attorneys at law, Goldfield, Nev., director.

Three dollars is bid for shares in the Montgomery-Shoshone Mines Co.; and if, at the end of a few months' development work it is demonstrated that the Montgomery has the same value, your investment should quadruple at least.

Again, if the development work on the Shoshone proves that the enormous vein already uncovered on the Shoshone has depth, which all mining engineers who have inspected the property declare it has, then shares in the Montgomery-Shoshone may reasonably be expected to advance to \$20.00. Mr. Peery is of the opinion that the development work on the Montgomery will demonstrate a mine as big as the Shoshone and that it is only a matter of two months when Montgomery shares will keep pace in market value with Shoshone shares.

Telegraph your reservation of shares to D. H. Peery Co., Goldfield, Nev., and let your remittance follow by mail. The right is reserved to reduce your subscription if the allotment is oversubscribed.

D. H. Peery Company refer by permission to McCornick & Co., bankers, Salt Lake City; John S. Cook & Co., bankers, Goldfield, Nev., and Nye & Ormsby County Bank, Goldfield, Tonopah and Carson City, Nev.
